Personal Profile

I am a Junior Full-Stack Developer eager to start my career in the tech industry after having previous experience in retail and customer service. I recently completed a Level 5 Diploma in Web Application Development with Code Institute. My skills include HTML, CSS, Bootstrap, JavaScript, React, Python, Flash, Django, MongoDB, PostgreSQL and more. I want to apply my problem-solving, communication, and teamwork abilities within a tech environment.

Education

September 2023–September 2024   **Diploma in Web Application Development**
Code Institute - London - (Credit rated by Southbank University)

Technical Skillset

Technologies:	**HTML5, CSS, JavaScript, Python**
Databases:	**MongoDB, PostgreSQL**
Frameworks & Libraries:	**Django, Flask, Bootstrap, React**
Version Control:	**Git, Github, Heroku**
Testing:	**JEST**
Additional:	**Agile, AWS**

Portfolio Projects

1. **Obscura View -** Obscura View mimics a real-life e-commerce site for photography prints, providing users with a smooth, intuitive journey from browsing to purchasing. It captures the feel of a professional online gallery shop.
   Tech Stack - HTML, CSS, Bootstrap, JavaScript, Python, Django, PostgreSQL, Stripe API for payments and AWS for hosting media.
   GitHub - https://github.com/anthonyradose/obscuraview_milestone_project4

2. **Gamesay -** An app that lets gamers share reviews and opinions on their favourite titles using the RAWG API. It simplifies things by providing community-driven reviews, easy search features, and a clean design without unnecessary distractions.
   Tech Stack - HTML, CSS, Bootstrap, JavaScript, Python, Flask, MongoDB
   GitHub - https://github.com/anthonyradose/gamesay_milestone_project3

3. **QuizWorld -** This app was made to cover as many topics and difficulties as possible, allowing users to engage in quizzes using Open Trivia Database's API for questions.
   Tech Stack - HTML, CSS, Bootstrap, JavaScript
   GitHub - https://github.com/anthonyradose/quiz_milestone_project2

4. **Van Halen '83 -** A site designed to simulate what the band Van Halen's website would look like if today's internet existed back in the 1980s.
   Tech Stack - HTML, CSS, Bootstrap.
   GitHub - https://github.com/anthonyradose/vanhalen_milestone_project

Collaborative Project
Music Non-Stop - A classical music-themed memory card game designed to enhance your memory while appreciating classical music.
Teck Stack - HTML, CSS, Bootstrap, JavaScript.
GitHub - https://github.com/music-non-stop/music_non_stop

Work Experience
June 2020–September 2024   **Web Development Career Transition**
During this period, I had the fortune to pursue a different career path in Web Development through self-learning, hands-on projects, and collaboration. A summary of my journey can be found in the certifications section.

November 2019–March 2020   **Barista**   **London**   **Bread Ahead**
- Customer service duties, including operating the till, answering the phone, and serving tables.
- Food preparation and inventory management.
- Store opening and closing responsibilities.

October 2018–October 2019   **Assistant Manager**   **Billericay**   **Domino's**
- Monitoring stock, cashing up drivers, closing the store, and counting the till.
- Training and developing staff on how to take and make orders, interact with customers, and conduct themselves professionally.
- Managing all aspects of customer service, including customers' orders, inquiries, and complaints, both in person and over the phone.

Certifications
- **Udemy Web Development Course (2020-2021):** Learned HTML, CSS, JavaScript, and more.
  Certificate - **[Udemy](#)**

- **Collaborative Projects (2021-2022):** Worked on projects with a friend, applying front-end skills and learning React along the way.
  GitHubs: [CyberDyne](#), [Pokedex](#)

- **Personal Web Development Project & Code Academy (2022-2023):** Built a frontend React app and took various courses on CA.
  GitHub: [Weather-App](#), Certificates: [Code Academy](#)

- **Code Institute Short Certificate (2023):** Completed a project-based course, leading to acceptance into the full diploma program.
  GitHub: [Milestone Project1](#)

- **Code Institute Full-Stack Diploma (2023-2024):** In-depth front-end, back-end, and database training.
  Certificate: [L5 Diploma](#)

Interests/Additional Information
- I regularly participate in hackathons at Code Institute.
- I am currently learning TypeScript.
- I am learning French and Japanese as hobbies.
- I enjoy listening to and playing music, mainly the guitar.
